Introduction

Masterful Company factory established in, Erbil, Kurdistan Region / Iraq.

The concept of construction and engineering inspection for the oil field facilities according to the international standards and integrated engineering services that meet the global construction industries requirements have been adopted by our company, it is meant to be mentioned the terms construction and engineering inspection are, indicated to engineering consultancy, design, projects management and site work conductions, with engineering site supervisions.

The engineers in our factory are intensively focused to exceed the valued customers' expectations. In addition to low-cost sophisticated design solutions are provided of which Masterful is characterized than any other companies in the region.

Our Goal

To achieve customers' demands to the utmost limit, and to make their experience with us indispensable.

Our Vision

Our vision is to provide our customers unconventional solutions to create brilliant experiences through innovation and modern technology.

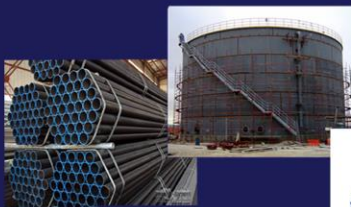

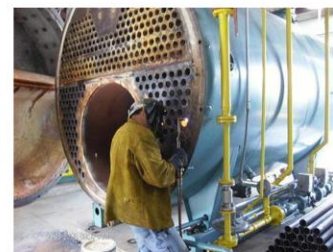

GENERAL CONSTRUCTIONS AND MAINTENANCE SERVICES

Masterful company is expert to manufacture and maintain a various kinds of oil equipment as storage tanks, pressure vessels, heat exchangers, steam boilers as well as piping networks, depending on certified welders, with the use of certified machines and tools.

The manufacturing process is subject to international standards like (ASTM, ASME, API, ANSI, AWS, TEMA,etc.) using suitable welding procedures, likewise qualified welders entitled to carry out welding lines free of defects to ensure passing successfully the engineering inspection process, plus our company has a good experience of how to maintain the oil equipment, repairing, painting, washing out, deep cleaning services, calibration of devices...etc.

Our company has a big experience in the field of welding processes, likewise preparing the required standard documents, with the use of qualified welders and certified welding machines.

STEEL STRUCTURES AND PREFAB BUILDINGS SOLUSION

Masterful company provides comprehensive building solutions for his valued customers based on their demands.

Through its experiences and competencies, Masterful company seek to provide design, manufacturing, erection of all kinds of prefabricated buildings structures that are made of steel sections such as caravans, single – story and multiple – story buildings. Water, sound, and thermal insulated materials of high specifications are used to keep up with the accelerating development in line with the urban prosperity in the world.

Steel structure and pipe rack designs, manufacturing, and son-site erection according to the latest standards of construction are made in this section.

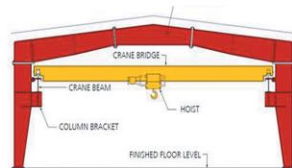

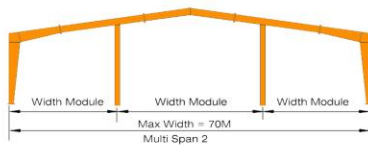

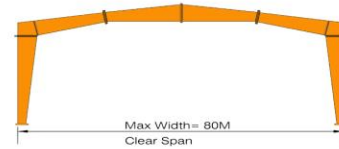

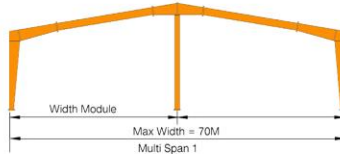

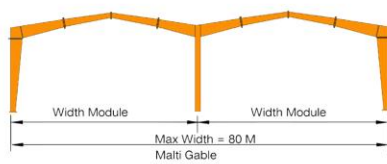

Masterful company keens to find all the low-cost appropriate solutions to implement steel structures using highly sophisticated machines in cutting, assembling, and welding processes, following up modern technical methods in manufacturing, painting, and packaging stages.

All produced steel structures are subject to engineering inspection process to avoid defects or harms.

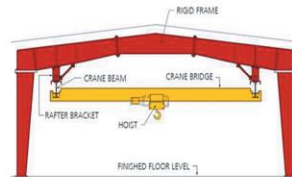

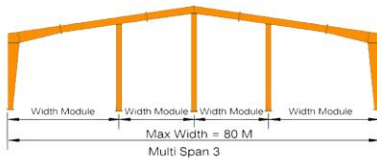

Masterful company is strongly seeking to compete with other well-known factories through the strict commitment of all international standards and meeting customers' demands.

Engineering Inspection Services.

Our company provides full services with regards to engineering inspection services for the oil equipment and the non-destructive tests with accordance to the international standards and codes, the exams are performing by qualified inspectors, and consequently issuing the inspection certificates.

Masterful company has qualified staff which are able to exam welders and, awarding them qualified certifications.

Masterful Company is also able to perform the thorough examination for the lifting equipment, herewith testing the equipment operators themselves able to award certifications for operate their equipment, Masterful company is qualified to award certifications for rigger and slinger personals, all the test and thorough exams are been executing by licensed staff.

Non-Destructive Tests (NDT):

1. Visual test (VT).
2. Magnetic particle test (MPT)
3. Ultrasonic Inspection (UT).
4. Liquid Penetrating Test (DPT).
5. Radiographic Test (RT).
6. Leak Test.
7. Thickness Test.
8. Hydrostatic Test.
9. Pneumatic Test.
10. Vacuum Test.
11. Hardness Test.

Cranes And Lifting Equipments Inspection

Lifting Equipment Inspections and crane thorough examination and certifications (Stationary cranes, Mobile Cranes, Forklifts, lifting terrains, telescoping cranes, etc.)

Lifting Gears testing and lifting Gears thorough examination and certification, (Slings, Shackles, bolts, chains, webbings,etc.)

Exam and certified crane and equipment operator, riggers, slingers and awarding certifications,
